ABOUT US

India's Freight Pricing Transparency Platform

TruckGuru LLP is a Vadodara-based B2B full truckload (FTL) intercity truck booking platform. We built TruckGuru to fix one problem: shippers had no way to know what a truck should cost before committing. Our platform shows the transport rate upfront -- no negotiations, no surprises, no hidden charges.

Operating across 110+ cities in India, we connect manufacturers and SMEs with the right truck for their cargo. From a 1.25-ton Tata Ace for small shipments to 18-ton 32ft MXL containers for heavy industrial freight -- every booking starts with a transparent rate.
